

Maarit Hosio, principal
Kytöpuisto School Vantaa

The schoolsystem is based on..

The main goal is...

- * To provide a whole path of learning through the school for every child.
- * No dropouts
- * Provide the support needed
- * Two levels of support: intensified support and special support

Intensified support

- * For those children who need support in one or two subjects (2-3 hours/week given by part time special education teacher)
- * For those children who have difficulties in learning Finnish language and who have lived in Finland for many years (2 hours/week given by Finnish as a second language teacher)
- * Special materials, smaller groups during the schoolday, less homework, reducing of exercises (less is more), focusing on main things...

Special support

- * For those, who need even more support, perhaps own goals in one or more subjects
- * For those, who need a small group to support the child because of either learning or behavioral problems
- * Special material, adjusted curriculum, special education teachers as classteachers
- * Integration to other classes when ever possible, notice the strengths of the child!

The curriculum

- * The student is an active learner
- * Examination of bigger phenomena, not subject-related
- * Co-operation (students and teachers as well)
- * Evaluation: self-evaluation and peer-evaluation during the studies
- * Evaluation must be many-sided and supportive!
- * <https://www.youtube.com/watch?v=hTIAMSR9DYM>

About digital materials

- * Digitality is seen as both the aim of learning and an instrument
- * Distance learning in basic education is not an option, we always need a teacher present!
- * Infra in Vantaa basic education: one tablet/two students + computers in every classroom + several computers in one classroom or divided in several classrooms + BYOD
- * Google Apps for Education, GAPE

It's not just the Internet...
